

Nursing Online Course Design: Scenario Based Learning Using an Interactive Tool

Moses Wolfenstein, Academic ADL Co-Lab

Terry Tao, University of Wisconsin-Extension CEOEL

Tae K. Jeon, University of Wisconsin-Extension CEOEL

Sylvan Esh, University of Wisconsin-Extension CEOEL

Patrick Wirth, University of Wisconsin-Extension CEOEL

Conor Grebel, University of Wisconsin-Extension CEOEL

Susan Gallagher-Lepak, University of Wisconsin-Green Bay

Martina Adams, Froedtert and The Medical College of Wisconsin

General background

- Division of Continuing Education, Outreach, and online Learning
- Partnerships with campuses across the University of Wisconsin system.
- Ongoing work with UW-Green Bay's Professional Program in Nursing
- Opportunities to develop better online learning experiences.

The BSN-LINC Program

- An RN to BSN distance learning program
- Targeted at out of state students
- In it's 15th year
- 30 credit hours total for Upper Level Courses
- Includes practicum w/ remote partner institutions.

Course: Clinical reasoning

A shift to Scenario-Based Learning

- Nursing students need to confront a variety of different situations.
- Assessment and feedback need to be separated.
- Scenarios need to provide access to external online resources from original cases.
- Original case has a progressive 3 part structure.

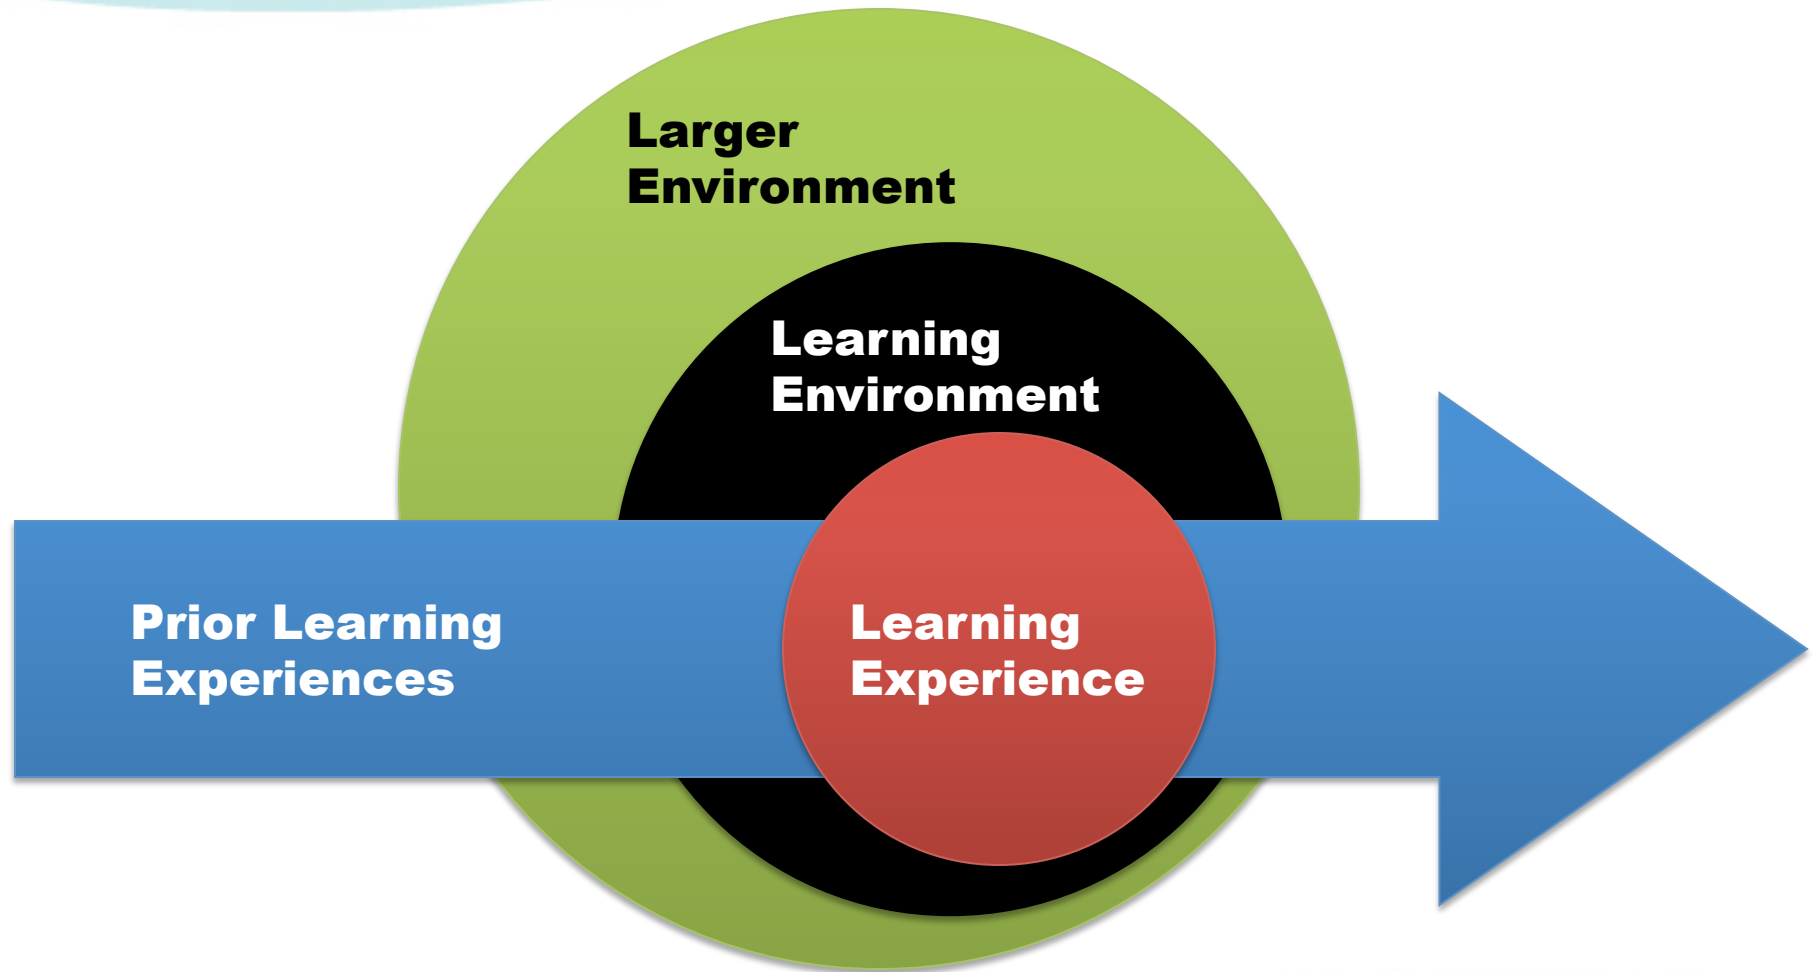

Challenges of Scenario-Based Learning

- The “branching narrative” issue.
- Real practice involves feedback from coworkers/ supervisors.
- Performance analysis needs to account for series of decisions over time.
- Purpose is learning, not evaluation.

The Micro-SBL benefits

- Productivity for designers/ developers/ instructors.
- Accessibility for learners
- Sustainability for learners – because of smaller size of scenario.
- Expandability to a large amount of scenarios.
- Affordability to produce SBL module quickly.
- Applicability to other discipline areas.

Constructivist background

Instructional Theory Framework

The Micro-SBL concept & Reigeluth's four instructional principles framed:

1. Gain the learner's attention
2. Present information
3. Provide practice materials
4. Provide feedback

Designer/SME Dynamics

- Instructor at a distance, no physical presence in meetings with designers.
- Designers' struggle in making design decisions.
- Instructional designers and multimedia designers' brainstorming for design decision of Micro-SBL.
- Value of a primary designer contact with instructor for the designer team.

Initial mock-up

Here is a possible long-form question, it takes up more space than normal. This question may have more than one sentence, but hopefully it can fit into this box without having to add a scrollbar.

A Lorem ipsum dolor sit amet, consectetur adipiscing elit. Morbi tempor orci vel enim blandit fermentum eget at nunc. Quisque tempus.

B Lorem ipsum dolor sit amet, consectetur adipiscing elit. Etiam eu pharetra mauris. Nunc a pharetra urna. Phasellus interdum congue faucibus. Aliquam vitae ultricies lacus. Quisque a lacinia ipsum. Nunc sed ornare urna. Maecenas molestie porttitor leo, in ultricies orci malesuada.

C Lorem ipsum dolor sit amet, consectetur adipiscing elit. Etiam eu pharetra.

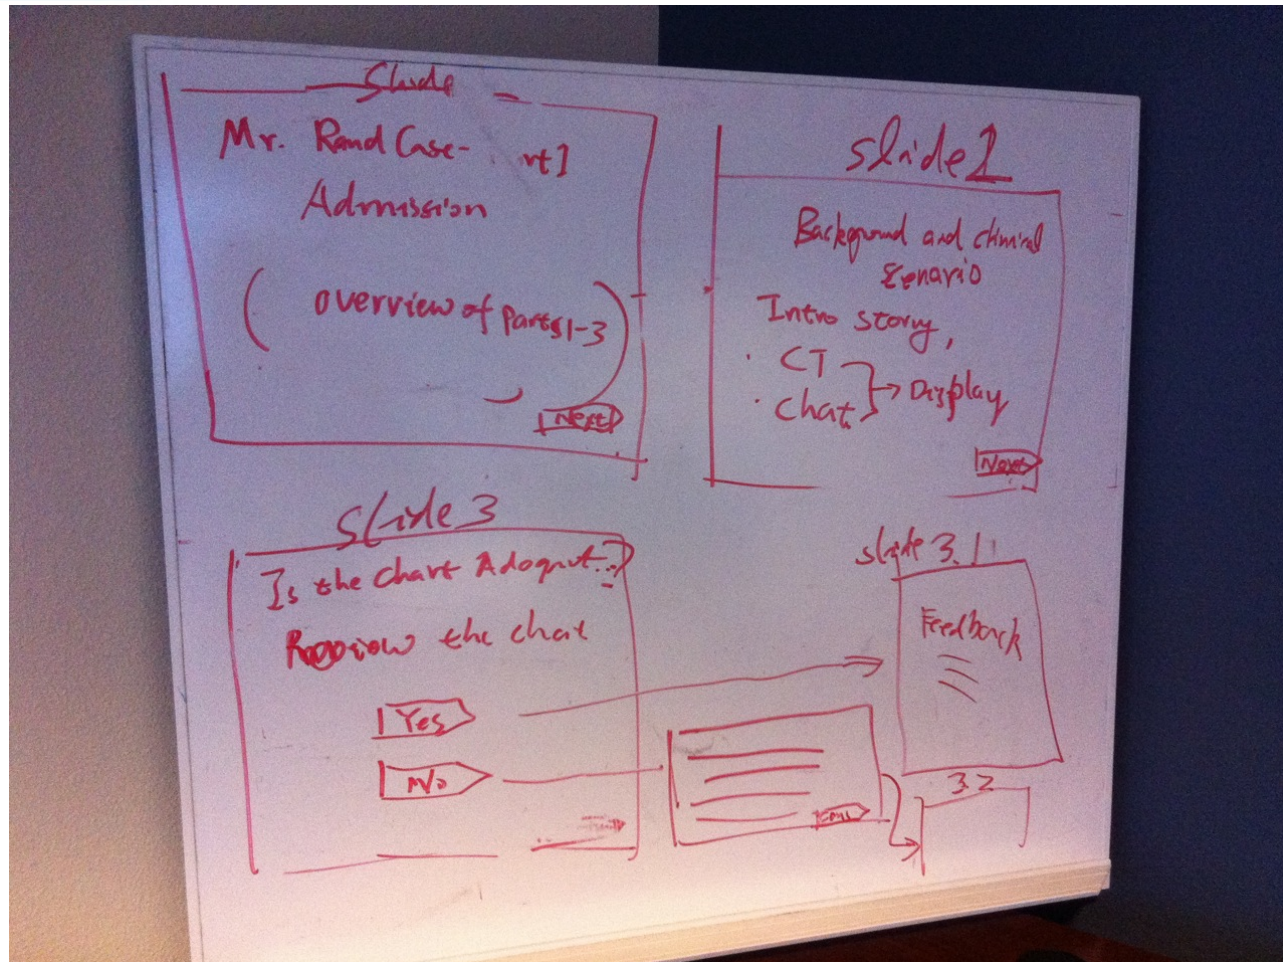

D Lorem ipsum dolor sit amet, consectetur adipiscing elit. Aenean et tellus non elit tincidunt aliquam.

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Etiam eu pharetra mauris. Nunc a pharetra urna.

Micro-SBL

Automating development

Next Steps

- User testing and refinement.
- Develop Micro-SBLs for parts 2 and 3.
- Deployment in BSN-LINC program.
- Develop and test form for automation.
- Implement Micro-SBL resources across other courses and programs.
- Explore optimization of Micro-SBLs as Learning Objects.
